## Summary

Frontend-focused Software Developer with experience building scalable web applications using React, Next.js, and modern JavaScript. Skilled in developing responsive user interfaces, integrating REST APIs, and optimizing performance for production applications. Experienced working in Agile teams, contributing to full-stack features, code reviews, and UI improvements. Passionate about building clean, efficient, and user-centric web solutions.

## Education

### Bachelor of Engineering in Electronics and Communication Engineering

Visvesvaraya Technological University, Karnataka, India

2021 – 2025

CGPA: 7.83

## Experience

### Software Developer

Jan 2026 – Present

Orbit Core Tech LLP, Bangalore, India

- Developed full-stack features with reusable React/Next.js components and Node.js backend integrations
- Enhanced application scalability through optimized code and efficient database handling
- Conducted code reviews, debugging, and performance tuning in collaborative environment

### Frontend Developer

Jan 2025 – Dec 2025

Orbit Core Tech LLP, India

- Built responsive web interfaces using HTML, CSS, JavaScript, React, and Next.js
- Collaborated on API integrations and UI/UX improvements with backend and design teams
- Optimized frontend performance (reduced load times by up to 30%) and ensured cross-browser compatibility

## Projects

### MySchkool – Learning Management Platform

React.js, Node.js

- Developed a full-stack educational platform with separate Admin, Teacher, and Student portals
- Enabled course management, student enrollment, and content delivery through role-based access
- Designed responsive UI using React and implemented backend APIs for seamless data handling
- Live: [myschkool.com](https://myschkool.com)

### Machaliwala – Online Food Ordering System

React.js, Node.js

- Built a multi-portal system for managing fish/meat orders with Admin and Butcher dashboards
- Implemented order workflow where admin verifies availability and forwards orders to butcher for processing
- Enabled real-time order status updates from processing to completion within the system
- Integrated structured order handling logic to streamline operations (excluding delivery module)
- Live: [machaliwala.com](https://machaliwala.com)

### Riyaz-ul-Uloom Official Website

React.js, Tailwind CSS

- Designed and developed a scalable, multi-page institutional website with structured sections including Home, About, Speeches, Blog, AI Videos, Books, Activities, and Contact

- Implemented a mobile-first responsive design system using Tailwind CSS, improving cross-device accessibility and consistency by 40%
- Integrated REST APIs for dynamic content rendering across key modules (Speeches, Blogs, Activities, Books), reducing manual content dependency by 60%
- Engineered internationalization (i18n) support for multi-language content delivery, enhancing user reach and accessibility for diverse audiences
- Optimized performance and page structure, achieving faster load times and improved user engagement
- Live: [riyazululoom.org](https://riyazululoom.org)

### **Rifah Connect Admin Panel**

React.js, Tailwind CSS

- Designed and developed a full-featured admin dashboard for an invite-only professional networking platform
- Built a scalable, component-driven UI architecture with sidebar navigation, improving admin workflow efficiency by 35%
- Integrated multiple REST APIs for real-time data handling including user management, approvals, analytics, and platform operations
- Delivered a pixel-perfect, mobile-responsive interface with consistent design system across all admin modules
- Improved data visibility and operational control for platform administrators through structured dashboard layouts
- Live: [admin.rifahconnect.com](https://admin.rifahconnect.com)

### **AI-Powered Learning Platform**    Next.js, React, Clerk, Drizzle ORM, Neon PostgreSQL, Gemini API

- Built personalized learning platform with user dashboards, secure authentication, and role-based access
- Integrated Gemini API for dynamic content/summaries and YouTube API for relevant video resources
- Designed scalable backend architecture; production deployed at [learn.orbittechhub.com](https://learn.orbittechhub.com)

### **Personal Portfolio Website**

React.js, Firebase

- Designed responsive site to showcase projects, skills, and experience
- Hosted on Firebase: [naveedportfolio-5c091.web.app](https://naveedportfolio-5c091.web.app)

### **Technical Skills**

**Programming Languages:** JavaScript (Advanced), Python, SQL, C++ (Basic)

**Frontend Technologies:** HTML5, CSS3, React.js, Next.js, Angular, Tailwind CSS

**Backend Technologies:** Node.js

**Databases & Tools:** PostgreSQL, MongoDB, Firebase, Git

**Languages:** English (Fluent), Kannada, Hindi
